

The Green I Initiative Foundation, TGIIF GramEnergy (Education / Village & Water)

The Green “I” Initiative Foundation is a registered NGO which is bridge between International NGO’s (like us), Corporate Companies and Rural Underprivileged Population.

Why The Green I Initiative Foundation?

1. We are expertise in Solar Energy Project and We can execute any size of projects at anywhere in India
2. We have a young team especially youngsters between the age-group 18 to 30, who are passionate about such projects.
3. We are having good relations with rural - Adiwasi villages which can help in getting authentic data and executing right projects for right target audience.

No grid-power access / load shedding / non affordable electricity installation

Hampering education as well as poor health due to kerosene lights or conventional lights

No much economical development due to less power

We at **Rotary District 3141** along with **The Green “I” Initiative Foundation** are taking serious efforts to change the village scenario by installing solar energy gadgets in schools / villages, contributing towards educational and economical development of these people.

Gram Energy – Education (Module 1)

Distribution of **Solar Home Lights** with **giant Solar Cooker** for education development of rural school children of India considering their health too.

Gram Energy – Education (Module 2)

Installation of **Solar PV (Off-Grid) System** In rural school premises for education development of rural schools reducing their electricity bills.

Gram Energy – Education (Module 3)

Installation of **Solar Cooker** In rural school premises for Mid-day meal facility for education development of rural school children of India considering their health.

Gram Energy – Village (Module 1)

Installation of **Solar PV (Off-Grid) System** rural villagers for their economical development

Gram Energy – Village (Module 2)

Installation of **Solar Street lights** for rural village for their economical development

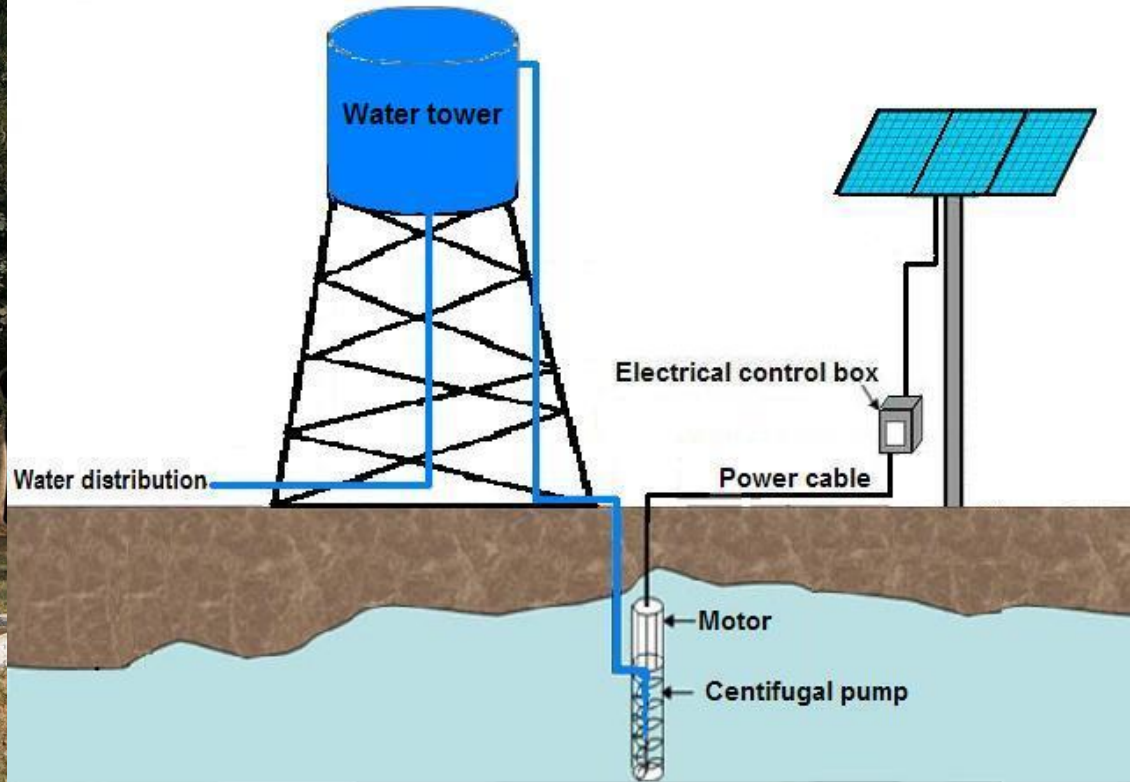

Gram Energy – Village (Module 3)

Complete village development with the installation of **Solar PV (Off-Grid) System, Solar Street Lights & Solar Dual Pump System** for rural villagers for their economical development

How can we contribute
in Villagers Growth?

Gram Energy – Water (Module 1)

Installation of **Solar Dual Pump System** with Rain Water Harvesting for the water requirement of rural village.
